Alex Qin

Staff Software Engineer | Android and XR

Toronto, ON | (416) 825-0396 | alex.qyq@gmail.com | linkedin.com/in/yaqianqin

Summary

Staff software engineer with 15+ years in software development, specializing in Android architecture, AOSP, and XR. Led mobile technical design, built shared application components, and owned consumer products from architecture through release.

Core Skills

Kotlin, Java, Android, AOSP, Jetpack Compose, Compose for XR, ARCore, Kotlin Multiplatform, Hilt, Robolectric, C++, Android NDK; mobile architecture, reusable components, SDK design.

Selected Experience

Google Dec 2024 - Present

Software Engineer, Android XR (XWF via Magic Leap)

- Developed avatar-creation experiences across Android XR headsets and Android phones, enabling users to move between headset and mobile applications.
- Improved performance, reliability, and usability across devices; partnered with UX and backend engineers to develop and release new features.
- Created an open-source sample application demonstrating interactive 3D experiences on Android XR.
- Developed a cross-platform prototype exploring shared functionality between Android and iOS.

Magic Leap Feb 2020 - Dec 2024

Staff Software Engineer

- Led mobile technical solution design and developed Java/Kotlin system apps for Magic Leap 2 OS, including Settings, out-of-box experience (OOBE), and Files.
- Designed reusable component libraries shared across system applications to reduce duplication and support consistent functionality.
- Designed Mobile Companion and Desktop Companion applications; prototyped Bluetooth connectivity, React Native implementations, and remote rendering for XR devices.

Foupon Inc. Sep 2018 - Oct 2024

Lead Engineer and Co-Founder

- Owned Android/iOS architecture, development, and releases for a restaurant coupon app reaching 500,000+ users in Canada, with discovery features backed by 10,000+ restaurants.

Amazon - Audible May 2019 - Feb 2020

Android Developer (Contract)

- Contributed to Audible's Android architecture and developed application components supporting the audiobook listening experience.
- Refactored existing code to improve maintainability and support ongoing development; improved stability and performance through targeted optimization.

Additional Experience

OnOff Labs | Principal Developer and Co-Founder | Feb 2017 - May 2019

Mercer | Senior Software Engineer | Apr 2010 - Feb 2017

Sage | Software Engineer | Aug 2006 - Aug 2009

Education

Hangzhou Dianzi University | Bachelor's degree in Computer Science
