Alex Qin

Staff Software Engineer | Android and XR

Toronto, ON | (416) 825-0396 | alex.qyq@gmail.com | linkedin.com/in/yaqianqin

Summary

Staff software engineer with 15+ years in software development, specializing in Android architecture, AOSP, and XR. Led mobile technical design, built shared application components, and owned consumer products from architecture through release.

Core Skills

Android and XR: Kotlin, Java, C++, AOSP, Jetpack Compose, Compose for XR, ARCore, Android NDK
Architecture: Mobile SDKs, reusable components, client-server APIs, Kotlin Multiplatform, React Native
Tools and testing: Hilt, Robolectric, Git, Gerrit, Gradle, CI/CD

Professional Experience

Google
Dec 2024 - Present

Software Engineer, Android XR (XWF via Magic Leap)

- Developed avatar-creation experiences across Android XR headsets and Android phones, enabling users to move between headset and mobile applications.
- Improved application performance, reliability, and usability across devices.
- Collaborated with UX and backend engineering teams to develop and release new features.
- Created an open-source sample application demonstrating interactive 3D experiences on Android XR.
- Developed a cross-platform prototype exploring shared functionality between Android and iOS.

Magic Leap
Feb 2020 - Dec 2024

Staff Software Engineer

- Led technical solution design for the mobile team across Android/AOSP, augmented reality, and spatial computing; authored technical designs and collaborated with UX, platform, and QA teams.
- Developed and enhanced Magic Leap 2 OS system applications, including Settings, the out-of-box experience (OOBE), and Files, using Java and Kotlin.
- Designed reusable component libraries shared across system applications to reduce duplication and support consistent functionality.
- Designed and developed Mobile Companion and Desktop Companion applications; prototyped Bluetooth connectivity, React Native implementations, and remote rendering for XR devices.

Professional Experience Continued

Foupon Inc.
Sep 2018 - Oct 2024

Lead Engineer and Co-Founder

- Led Android and iOS development for a restaurant coupon app reaching 500,000+ users in Canada, with coupon and nearby-deal discovery backed by 10,000+ restaurants.
- Owned requirements, architecture, implementation, testing, store releases, and maintenance; improved app performance, stability, and compatibility across devices and OS versions.

Amazon - Audible
May 2019 - Feb 2020

Android Developer (Contract)

- Contributed to Audible's Android architecture and developed application components supporting the audiobook listening experience.
- Refactored existing code to improve maintainability and support ongoing development; improved stability and performance through targeted optimization.

OnOff Labs
Feb 2017 - May 2019

Principal Developer and Co-Founder

- Led mobile application architecture, development, and delivery across Android, iOS, and BlackBerry, coordinating client requirements, development teams, QA, and releases.
- Built FoodFun, an Android and iOS food-ordering platform with PHP backend services on AWS.
- Developed an Android video application integrating YouTube APIs.

Vouchr
Nov 2017 - Aug 2018

Senior Mobile Developer

- Designed the architecture of Surprise, Vouchr's eGift application for Android and iOS, and developed digital gifting features and user flows.
- Designed the Vouchr SDK for embedded eGift and payment capabilities; collaborated with major banks on integration requirements and implementation.

Mercer
Apr 2010 - Feb 2017

Senior Software Engineer

- Built myTime Mobile for iOS and BlackBerry using Objective-C and Java, along with an HTML5/JavaScript version; developed Work Flow Wizard for iPhone and iPad.
- Designed service APIs for communication and data synchronization; managed offshore API/database development and coordinated third-party teams on application delivery.

Sage
Aug 2006 - Aug 2009

Software Engineer

- Developed SalesLogix Mobile CRM features using Java, VB.NET, SQL Server, and XML; prototyped an Android CRM client and designed a standalone BlackBerry database solution.

Education

Hangzhou Dianzi University | Bachelor's degree in Computer Science
